Portfolio : https://portfolio-1e5z.vercel.app/

## Personal Profile

I'm a Full-Stack Developer with hands-on experience in building scalable web applications using MERN Stack, Java Spring Boot, and .NET. Skilled in both backend and frontend development, API integration, and database management with MySQL, MSSQL, and MongoDB. Passionate about clean code, performance optimization, and delivering intuitive user experiences. I also have a growing interest in AI and machine learning, supported by recent certifications in the field.

## Education

**BSc (Hons) in Information Technology – Current (Expected 2026)**
• Sri Lanka Institute of Information Technology (SLIIT), Sri Lanka (2022 – Present)
o Specializing in Information Technology

## Work Experience

**Software Engineer**
Ceylon Crown Corporation (Pvt) Ltd. – Sri Lanka | Aug 2025 – Present
• Frontend development using React**.js** and Next.js
• Independently delivered 4+ projects with responsive UI
• API integration and Git-based version control

**Software Engineer**
360 Dominance (Pvt.) Ltd. – Sri Lanka | June 2025 – July 2025
• Developing and maintaining modern web applications using React.js, Node.js, and MSSQL.
• Collaborating with UI/UX teams to improve responsiveness and user experience.
• Managing version control with GitHub and handling deployments in a collaborative environment.

**Software Engineer**
EonTech (Pvt.) Ltd. – Sri Lanka | March 2025 – June 2025
• Contributed to a POS system and e-commerce platform (EZCart) using MERN stack and TypeScript.
• Engaged in testing APIs and resolving performance issues

**Software Engineer**
Thuli Software (Pvt.) Ltd. – Sri Lanka | September 2024 – March 2025
• Developed scalable full-stack applications using the MERN stack and Java.
• Integrated RESTful APIs and collaborated with cross-functional teams for agile delivery.
• Supported backend logic, user authentication, and MongoDB performance tuning.

**Software Engineer**
Thuli Software (Pvt.) Ltd. – Sri Lanka | March 2024 – September 2024
• Worked on academic and client-based projects using Node.js, React.js, and MongoDB.
• Assisted in building CRUD operations and front-end components with responsive UI.
• Learned best practices in version control (Git) and participated in peer reviews.

## Projects

**E-Commerce Website – Full-Stack Web Application (Full-Stack Developer)**
• Developed a complete e-commerce platform using the MERN stack with secure user authentication (JWT, OAuth,
• Focused on responsive UI design and efficient backend API handling for a seamless shopping experience.
• **Technologies Used**: MongoDB, Express.js, React.js, Node.js (MERN Stack), REST APIs, Tailwind CSS, Agile

**Candy Crush Game – Android Application (Mobile Developer)**
• Created a fully functional Candy Crush-style mobile game using Kotlin in Android Studio.
• Applied object-oriented principles to ensure modular, maintainable code.
• **Technologies Used**: Kotlin, Android Studio, OOP, Agile

**Online Computer Store – Inventory Management System (Full-Stack Developer)**
• Developed an inventory and order management system for a computer store using the MERN stack.
• Built secure backend services for quotations and real-time product updates with a responsive frontend.
• **Technologies Used**: MongoDB, Express.js, React.js, Node.js, REST APIs, Agile

**Online Customer Service System (Software Developer)**
• Built a customer inquiry and support management system to streamline business-customer communication.
• Developed CRUD operations for managing interactions and feedback using Java, HTML, CSS, and MySQL.
• **Technologies Used**: Java, MySQL, HTML, CSS, Agile

**Online Fuel Station and Vehicle Service Management System (Software Developer)**
• Designed a management system for handling fuel requests, service bookings, and customer records.
• Developed secure backend modules and efficient service management workflows.
• **Technologies Used**: Java, MySQL, REST APIs, Agile

**Skill Sharing Platform (Full-Stack Developer)**
• Developed a web platform for users to share and learn various skills, including content posting and interactions.
• Built scalable backend APIs with Spring Boot and a dynamic frontend using React.js.
• **Technologies Used**: React.js, Spring Boot, REST APIs, MongoDB, Agile

## Skills

**Web Frameworks**: React.js, Spring Boot, .NET, Node.js, Express.js
**Programming Languages**: JavaScript, TypeScript, Java, PHP, SQL
**Databases**: MySQL, PostgreSQL, Microsoft SQL Server (MSSQL), MongoDB
**Cloud & DevOps**: GitHub Actions, CI/CD (basic), Firebase (basic hosting), Docker (beginner)
**Tools & Others**: Git, GitHub, Bitbucket, Postman, Swagger, JUnit, Manual Testing, Agile Methodologies
**Soft Skills**: Problem-Solving, Teamwork, Adaptability, Communication Skills, Continuous Learning, Creativity

## Certifications

• **AI/ML Engineer – Stage 2** – SLIIT Centre for Open and Distance Education (June 2025)
• **Artificial Intelligence Beginners Guide** – Simplilearn (June 2025)
• **Getting Started with DevOps on AWS** – AWS Training & Certification (June 2025)
• **Java Programming Fundamentals** – Udemy (June 2025)
• **Python for Beginners** – University of Moratuwa – OpenUOM (June 2025)
• **Python and Flask Framework Complete Course** – Udemy (June 2025)
• **Selenium in C# – Setup Simple Test Automation Framework** – Udemy (June 2025)
• **JLPT N4 – Japanese Language Proficiency Test** – JLEA (November 2022)
• **JLPT N5 – Japanese Language Proficiency Test** – JLEA (November 2021)
